Mohammed Ramees Ummer

DATA ANALYST | BUSINESS INTELLIGENCE & RETAIL PERFORMANCE

Abu Dhabi, United Arab Emirates | +971 50 573 7096 | ramizumar@gmail.com
linkedin.com/in/mohammed-ramees-ummer-712b33246 | github.com/Ramees903757

PROFESSIONAL SUMMARY

Data Analyst experienced in daily MIS reporting and monthly performance reports covering various branches. Skilled in Excel, SQL Server, Power BI, Power Query, DAX, and Python for preparing reliable datasets, dashboards, and management KPIs. Background in inventory turnover, operating-expense analysis, sales-target discussions, and software development.

TECHNICAL SKILLS

Business Intelligence & Reporting: Power BI, Power Query, DAX, Microsoft Excel, Dashboard Development, KPI Analysis, MIS Reporting

AI Tools: ChatGPT, Claude, Copilot

Databases & Data Preparation: SQL, SQL Server, SSMS, MySQL, Data Modeling, Data Cleaning, Data Transformation, Data Validation

Python & Analytics: Python, Pandas, NumPy, Exploratory Data Analysis (EDA), Statistical Analysis

Additional Tools: Git, GitHub, Jupyter Notebook, React.js, Node.js, REST APIs, MongoDB

PROFESSIONAL EXPERIENCE

Data Analyst | Vestano International Pvt. Ltd., Kozhikode, Kerala, India *August 2025 – September 2026*

- Gave management a daily, reliable view of sales performance, by building standardized MIS and KPI reports across sales, billing, transactions, store performance, and inventory movement in SQL Server, Excel, and Power BI.
- Enabled side-by-side comparison of 10 supermarket branches for senior management, measured by 1 consolidated monthly report delivered by day 7, by consolidating sales, inventory, operating-expense, and profitability indicators into one consistent report.
- Aligned branch teams on next-month sales targets, measured by 2 monthly performance reviews led, by presenting operating results, sales trends, and performance issues to management and branch stakeholders.
- Surfaced the root causes of stock loss, measured by 10 variance items investigated, by analyzing stock-audit variances, wastage, and sales and purchase returns and recommending corrective actions.
- Improved visibility of inventory movement and working capital, measured by turnover ratios across 10 branches, by calculating inventory turnover and reviewing opening/closing stock and supplier payables.

Data Science Intern | iDatalytics, Calicut, Kerala, India *January 2025 – July 2025*

- Cleaned, transformed, and validated datasets with 10,000+ rows and 14+ columns using SQL, Python, Pandas, and NumPy for downstream analysis.
- Developed interactive Power BI dashboards and automated recurring KPI reports, reducing manual analysis time by 30%.
- Performed exploratory data analysis (EDA) and statistical analysis on structured and unstructured datasets to identify trends and patterns.

Junior Software Developer | Pennonn Technologies Pvt. Ltd., Kochi, Kerala, India *July 2023 – August 2024*

- Maintained React.js and Node.js web applications using REST APIs and MongoDB, converting application requirements into functional features.
- Collaborated with developers to troubleshoot technical issues and support frontend and backend enhancements.

PROJECT

UAE Retail & FMCG Business Intelligence Dashboard | SQL Server, SSMS, Power BI, Power Query, DAX | *Synthetic portfolio project*

- Validated 448,094 sales-line records spanning 100,000 transactions, 5,000 SKUs, and 8 simulated stores in SQL Server.
- Standardized dates and numeric fields, handled valid anonymous-customer nulls, and checked duplicate identifiers and table relationships before reporting.
- Developed a six-page interactive Power BI dashboard covering revenue, store performance, products, inventory, wastage, and customer purchasing.
- Created DAX measures for revenue, gross profit, gross margin, average basket value, inventory valuation, and store-level targets.

EDUCATION

Bachelor of Engineering in Mechanical Engineering | Srinivas Institute of Technology *2018 – 2022*
